Séché Group

A world of solutions

Industrial effluents and sludge management

Séché Group, a recognized and trusted specialist from design to operation of your facilities

- Facility design for all capacity
- Building, extension, revamping
- Operation and maintenance
- Sludge management and recovery
- Mobile units

Séché's expertise

- A complete range of services
- Resources optimization and recovery for reduced operational costs
- Continuous improvement culture to outperform your expectations
- Dedicated experts at your service
- Reactivity and mobility

For all industrial activities around the world

- Agricultural industry
- Chemicals and petrochemicals
- Metallurgy
- Pharmaceutical / cosmetic
- Mining industry
- Surface treatment and painting
- Aerospace, automotive and rail
- Microelectronics

Environmental performance and costs optimization

Our engineering department and its dedicated laboratory research the most adapted solution. Our operation and maintenance department implement their recommendation during delegated management contracts .

- Pollution streams reduction
- Waste water recycling and reusing
- Sludge volume reduction
- Use of best available technologies such as physical-chemical processes, evapo-concentration, centrifugation, membrane treatment, biological purification: aerobic, anaerobic...

A recognized and diversified expert

- Simple and complex liquid effluent purification (hard COD, oils and hydrocarbons, organic pollutants, metals, micro-pollutants...)
- Hazardous products treatment (risk management for H2S, ATEX, CMR...)

Séché's expertise

A PROJECT CROSS-FIELD GLOBAL VISION

- High-tech skills, developing for more than 20 years
- Performance oriented and committed
- Health and safety risk management
- An industrial orientation
- A culture of continuous improvement to exceed your expectations

Facilities design

- Laboratory and industrial trials
- Sizing and design studies

Operation

- Regular assistance or delegated exploitation
- Maintenance, on-call duty/ monitoring

Building, extension, revamping

- Regulation evolution and site specificities integration
- Start-up and skills transfer

Sludge and effluent treatment mobile units

- Cleaning or draining on spot operations
- Emergency response
- On-site treatment
